In this connection, the Activities Office arranged with the proper channels, to start a soccer club. Needless to say, this idea was welcomed with enthusiasm by foreign students and Americans alike

Maybe the success of this venture will spur the Activities Office to the formation of clubs for other Continental games such as field hockey, cricket, and badminton While there exists the possibility of these games appearing strange to American culture, I am sure that eventually every one would begin to appreciate and enjoy these sports.

Dirwoode

Pour faire rire? Raison de plus!

Dearest Dirwoode,

It has been brought to my attention that Stacy has not yet installed a coin-operated stomach pump in the dorm cafeteria. I beleive that you should notify Stacy immediately of its omission.

unsigned

Dear unsigned,

Last year a semi-pneumatic triple hose machine made by the Gosh-O-Guzzle Company was set up in the dorm. For about four days it worked terrific. Then the financial backers got greedy. They offered an economy plan whereby two students, who were close friends, could buy a special 57/64" Y - connector for joint use. The "Double Guzzle Plan" enabled two students to use the machine for the price of one.

The plan also gave a shady character named Bertrand Flock (a small time hood from the twelfth floor of the "old dorm") an idea. He wrote his father, a bootleg plumbing supplier, to have him send a gross of 57/64" nipples. He welded these onto a ten foot pipe and by dinner time all the 144 positions were sold out. The entree was chicken a la king. After dinner, the machine was put to the test.

It was not until later that evening that it became apparent that something was wrong. About 11:00 that night, the machine walked out into a blinding snowstorm and was never heard from again.

Dirwoode

Dear Dirwoode,

I would truly like to see an improvement in our system of registration. The length of the lines is ridiculous. I stood in line for three and one half hours. Do so many students really drop out of school? I think they faint in line.

Our brilliant instructors and computers should get together on a better system. Dear Flash, I agree, although . . . . . but you really didn't have to suggest an answer.

I do not agree, and all my friends in Home Econ. 101 will back me up.

Dirwoode

Cher Dirwood,

Je comprends que les canards doivent bien parler toutes sortes del langues. Est-ce que tu parles, par hazard, le francais aussi?

Mange La M - - - d

Dear Mange,

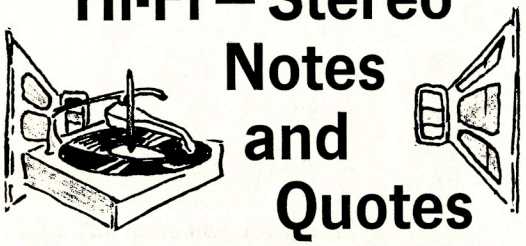
Alas, my French vocabulary is extremely limited, and I must rely on your honor as a Frenchman as to the import of your surname. I trust it is something presentable. Yet I am sure it must have some humorous connotation. "U.S. Dollar?" "British Isles?"

Wait! I've got it!: "hand that fed you."

Dirwoode

Ed. Note: You're right Dirwoode, it was a naughty word. He's a real stinker.

Hi-Fi — Stereo Notes and Quotes



With the advent of semi-conductor circuitry, the trend in hi-fi stereo components has turned toward the stereo receiver. These receivers combine tuner, control amplifiers and power amplifiers all in one small cool running package.

Most receivers are rated by standards of the Institute of High-fidelity. By knowing what to look for in these ratings, the stereo enthusiast has some basis of comparison among the several receivers now on the market.

The following points of receivers, listed in the order of importance, are rated by the I.H.F. standards IHFM-T-100: sensitivity, signal to noise ration, harmonic distortion, drift, frequency response, capture ratio, selectivity, spurious responses, intermodulation distortion, audio hum, and a.m. suppression.

When considering a receiver, the lower the values for the last six ratings, and the higher the rated value for the first five, the better a receiver will perform.

Stereophonically yours,

John Bunkfeldt

"BLAINSDALE" SHYS FROM LIGHTED LOTS

By Don Morris

Allow me to introduce myself. My name is Midnight–Midnight Gray. Actually Midnight is not my real name, but with a first name like Blainsdale, I had to find a nickname. What would you do with a name like that? I mean it just isn't every day that you walk up to a person and ask him his name and he replies, "My name's Blainsdale." You would probably take him as some
